Better Value on Lower Quantities . . . Faster turnaround

### Digital versus Litho

Digital and Lithographic are the modern and traditional methods of printing. There are advantages and disadvantages to each. In broad terms, Digital is simple to set up but has a higher cost per print and so is cheaper on smaller quantities. Litho is time consuming to set up but has a lower cost per print and so is expensive on smaller quantities but gets cheaper the higher the volume, ie. it has an economy of scale. Litho also offers a superior quality finish, using ink rather than toner, and can be printed on heavier material. Digital though, can be produced more quickly.

### The Creative Side

Before we can reproduce your printed item in the desired quantity, it must first be produced. This process is known as origination, and the original image from which we print is called 'Artwork'. This used to be hand drawn on Art Board but these days is created digitally. Since everyone has access to at least basic tools on their computer, often our clients will produce the Artwork themselves. If you would prefer that your Artwork was produced professionally in our studio, then you will need to pay for this process, but only the first time we print. Charges start at £7.50. Please see 'Graphic Design' under our 'Design & Image Services' overleaf.

## The Bigger Picture

We offer a range of very competitive image services, especially when it comes to photographic enlargements and large scale prints. In addition, it's so easy. All you need to do is email your image file to [prints@aybn.co.uk](mailto:prints@aybn.co.uk) with the required print size specified, along with your telephone number. We will then call you to clarify your order, and take your payment over the phone. You may collect your job within 24-48 hours depending on quantity.
